INFO

I'm finishing my bachelor's degree from university of Tampere this semester. In my studies I have been mostly interested in UI-design, user experience and user research. In my master's studies I'm focusing on human-technology interaction. I would describe myself as a "junior full stack designer" who has skillset to design and code front-end products. I would consider my core soft skills to be problem solving, logical thinking and general social skills. In my spare time I enjoy padel, basketball and long walks listening to podcasts.

SKILLS

- Programming: Python, JavaScript, Html, CSS, SQL

- Tools: Figma, Adobe XD, VS Code, GitHub, Office-tools

- Languages: Finnish (native), English (CEFR C1), Swedish (CEFR B1), German (CEFR A1)

RELEVANT WORKING EXPERIENCE

2020–2022 Omaguru – System specialist, *Elisa Oyj.*

· IT-support and network troubleshooting for Elisa's customers, technicians and sales personnel

· Deep knowledge of Elisa's B2C products and Windows environment

2020 Junior telecommunication specialist, *Elisa Oyj.*

· 2nd level problem solving in network errors.

· Fiber-optic cable installation planning for detached house customers

EDUCATION

2018–2023 Approx. 5/2023 B.S. Computer Science, University of Tampere, Tampere

2014 Matriculation examination, Kimpisen Lukio, Lappeenranta

SOME PROJECTS I HAVE WORKED ON

2022 Futurice.com website renewal

- I was part of student development team doing renewal of Futurice.com website.

- Technologies used: Next.js, CSS modules, TypeScript, Netlify, Contentful

2021 User research for Funidata Oy

- I was part of team conducting user research of Sisu student system. We figured out key functionalities of Sisu and created tasks around them.

After that we conducted several remote user tests and analyzed the results. We found out some key pain points of Sisu system and it was developed based of our research.
